## Education

B.A. in Philosophy

Cornell University

2008-2012

Web Dev Immersive

General Assembly

2015

# ARSAMES QAJAR

Web developer intrigued by novel integrations and frameworks, focusing on the development of applications using languages from Meteor-Angular to Ruby on Rails, SQL, and APIs. Coming from a background in financial engineering and philosophy, my diverse experience is team-oriented and enhances product development.

## Experience

### General Assembly Immersive

Web Development Immersive Student

01/2015-04/2015

Santa Monica, CA

Experienced with front-end frameworks, especially javascript, such as AngularJs & MeteorJs. Lots of team work, with strong project experience developing the back-end using Ruby on Rails and SQL to query databases. Experienced Heroku and Git to fulfill project requirements. Experienced with APIs such as Eventbrite and saving information to Ruby on Rails database.

- **APIs for web applications** to create interactive user experience and robust web apps
- **Practiced TDD** using Rspec
- **Pitched project ideas** for a team to collaborate on on web applications
- **Deployed projects** to Heroku

### ACES (Academic Consulting Education Services)

Founder

03/2013-09/2014

Los Angeles, CA

Project management and development of a coherent system to help teams achieve their full potential. ACES framework was used as a tool to identify obstacles students may face in and outside the class. Partnered with Boys & Girls Clubs of the South Bay to improve diagnosis design and collaborate with members using ACES' tools.

- **Raised 10k++** in donations/fundraising activity within a month
- **Development of database** of knowledge resources
- **Development of "Food Angels" program** to offer healthy meals to over 600+ kids, Monday-Friday

### EP Wealth Advisors

Investment Management Associate

7/2012-03/2013

Torrance, CA

Managed portfolios for clients while using multiple frameworks and internal software to develop and ensure the best financial products. Used web technologies for internal software to yield prudent financial decisions.

- **Handled trades** up to 100 clients/day
- **Consolidated equity** research reports using web technologies from Goldman Sachs, JP Morgan, etc for internal software
